RE: Light Squared Subsidiary, LLC  
Ex-Parte Communication, IB Docket No. 11-109  
IBSF File No. SAT-MOD-20101118-00239

Honorable Madame Secretary;

Although I am not an attorney, cannot practice law in any venue or jurisdiction, and certainly cannot grasp the Constitutional or Statutory Rights of the Parties in Light Squared Subsidiary, LLC's recent Petition for the Federal Communications Commission to proceed to affirm its licensure of certain frequencies for their use; it is sincerely and humbly requested that Madame Secretary strongly consider denial of any such approval of the subject Petition.

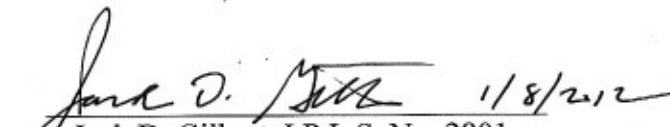

It is the purpose of this humble pleading to provide an additional perspective and consideration of the real life detrimental and irreversible effects such an approval will surely cause, and therefore ascertain that Madame Secretary is again informed on the highly likely calamity the degradation and disruption of the GPS utility will cause to all Citizens of the United States in one manner or another for generations to come.

Light Squared LLC's Petition requests approval of their use of certain frequencies that will absolutely and positively disrupt and devastate reliable and accurate Global Positioning Satellite signals as shown by the results of independent recent tests. This interference will degrade and diminish the reliability, capabilities, and use of the signals of the GPS system to a state that would result in hazards to aviation, navigation, agricultural and construction operations (as most recently proved in extensive testing which was published), and in every facet of business and society reliant upon the present and continued use of the Global Positioning Satellite system. There are also unquantifiable Military, Law Enforcement, Emergency Services, Meteorological, Geodetic, Oceanic, Outer Space, and other untold applications of the use of the GPS system that would be rendered inaccurate or void.

In summary, it would appear that the present GPS utility that has been developed for the use, peace of mind, and good of all mankind, as we now know it, will cease to exist and result in a severely adverse detrimental effect on the conduct of all Governmental operations, the Free Enterprise System of Business, and the Safety and Security of all Citizens.

It is sincerely and humbly requested that Madame Secretary strongly consider denial of any approval of the subject Petition of Light Squared, LLC.

Sincerely;

  
Jack D. Gilbert, I.P.L.S. No. 2801  
ATP/COMM'L (CFI A&I, ME, Retired/Inactive)
